SUMMARY

I'm a mobile app developer with 1.5 years of experience using Flutter and Dart to build apps. I create apps that work well on all devices and connect to the internet with Firebase. I also use Node.js to make strong back-end systems for my apps. I focus on building apps that are simple and enjoyable for users. I stay updated with new trends, work great in teams, and care about details to deliver smart, complete solutions

EXPERIENCE

CodeMiners

Feb 2023 - Jan 2024

Lahore, Pakistan

As a Flutter Developer at Codeminers, I worked on building apps for industries such as real estate, vehicle rentals, and communication. I focused on creating high-quality apps that connect to back-end services, ensuring smooth performance and clean, maintainable code.

- Developed a property management app with advanced search and interactive maps.
- Built a secure car rental platform with easy payment options. Created a messaging app with real-time chat and user-friendly features. Collaborated with the team to improve app features based on user feedback.
- Optimized app performance for smooth and responsive experiences.
- Delivered projects on time, meeting both functionality and user experience goals.
- Integrated back-end services via APIs for dynamic content and smooth app interaction.

ROGPAD TECHNOLOGIES PVT

Nov 2024 - Present

Delhi, India

As a Flutter Developer at Rogpad Technologies, I developed user-friendly apps for businesses. I led the creation of a communication platform and a financial management app, focusing on clean design, real-time data integration, and smooth performance across all devices.

- Led the development of a communication platform to improve team collaboration.
- Created a financial management app to help users manage bills and payments for multiple companies.
- Designed clean and responsive app interfaces for an enhanced user experience.
- Integrated real-time data using Firebase to ensure smooth app functionality.
- Ensured apps performed well across all devices and screen sizes.
- Collaborated with the team to deliver apps that met user and business needs.

PROJECTS

1. **WorkerFinder (Under Development)** : An app where users can find and contact workers like carpenters and plumbers. Workers can accept jobs, manage bookings, and chat with customers. It is being built using Flutter for the app and Node.js for the backend.
2. **Bismillah IT College Portal (Under Development)** : A management system for college branch admins and owners. It helps them handle courses, announcements, and student records efficiently. Built with React for the frontend and Firebase for the backend.
3. **MetroCay** : Designed an inter-city bus booking app with real-time seat availability, booking management, and Firebase integration to ensure secure transactions and smooth navigation.
4. **CarFlex**: Developed a car rental and sales app with features like booking, payments, and location tracking, ensuring a seamless user experience.
5. **Lepo App**: Built a comprehensive real estate platform for property listing, filtering, and map-based search integration.
6. **Estates**: Designed a property management app enabling dynamic updates and secure Firebase Authentication.
7. **E-Commerce Application(Shopify in flutter)**: Created an online shopping platform with API and JSON integration for real-time inventory management and transactions.
8. **Medical Application**: Developed a responsive app for healthcare services, integrating Firebase Authentication for secure user login and patient records.
9. **Work Chat App**: Built a Flutter-based desktop application for business communication, enabling real-time messaging
10. **PayHub App(Desktop & Mobile App)**: Created a bill management platform supporting multiple company profiles, offering seamless transitions and user-centric design.
11. **Alice Dating App** : Get AI-powered reply suggestions for any message, even from a screenshot! Upload a chat screenshot, and Alice will generate the perfect response to keep the conversation flowing smoothly.
12. **HelperLog** : A simple app for companies to track their trucks, assign new tasks, and see their location in real time. Manage deliveries easily and keep everything organized! [\(Link\)](#)
13. **HelpOut (User)** : A simple app to find service providers like carpenters and plumbers nearby. Contact them easily and get your work done hassle-free [\(Link\)](#).
14. **HelpOut (Provider)** : Service providers can accept bookings from customers and manage their work. Stay connected with customers and grow your business [\(Link\)](#).
15. **HelpOut (Admin)** : The admin app helps track service providers and customers. It ensures smooth operations and provides support when needed [\(Link\)](#).
